

Welcome to Trac 0.9.5

Trac is a **minimalistic** approach to **web-based** management of **software projects**. Its goal is to simplify effective tracking and handling of software issues, enhancements and overall progress.

All aspects of Trac have been designed with the single goal to **help developers write great software** while **staying out of the way** and imposing as little as possible on a team's established process and culture.

As all Wiki pages, this page is editable, this means that you can modify the contents of this page simply by using your web-browser. Simply click on the "Edit this page" link at the bottom of the page. [WikiFormatting](#) will give you a detailed description of available Wiki formatting commands.

"[trac-admin](#) *yournvdir* initenv" created a new Trac environment, containing a default set of wiki pages and some sample data. This newly created environment also contains [documentation](#) to help you get started with your project.

You can use [trac-admin](#) to configure [?Trac](#) to better fit your project, especially in regard to *components*, *versions* and *milestones*.

[TracGuide](#) is a good place to start.

Enjoy!
The Trac Team

Starting Points

- [TracGuide](#) -- Built-in Documentation
- [?The Trac project](#) -- Trac Open Source Project
- [?Trac FAQ](#) -- Frequently Asked Questions
- [TracSupport](#) -- Trac Support

For a complete list of local wiki pages, see [TitleIndex](#).

Trac is brought to you by [?Edgewall Software](#), providing professional Linux and software development services to clients worldwide. Visit [?http://www.edgewall.com/](http://www.edgewall.com/) for more information.
